Historically, "...advanced degrees were not a criterion for professorships at most colleges. That began to change as the more ambitious scholars at major schools (began to immigrate from) the U.S." in the mid-1800s. Furthermore, "half of the institutions awarding earned Ph.D.s in 1899 were undergraduate institutions that granted the degree for work done away from campus...Degrees awarded by universities without (association and/or U.S. Department of Education certified) Ph.D. programs accounted for about a third of the 382 doctorates recorded by the U.S. Department of Education in 1900." Among these doctorate degrees, "8-10% were honorary" .i.e. H.Ph.D.

- 4335 13. Statement on the Ph.D. **Excerpts from Education Foundation, "History of Education and History of The PhD", Education Foundation Preliminary Paper Series, with sincere gratitude to EF PRA James E Curtis, Jr & Wikipedia.org.**
"A Doctor of Philosophy,...Ph.D. or PhD..is the highest academic degree awarded by universities in most countries. Ph.D.s are awarded for programs across the whole breadth of academic fields. The completion of a Ph.D. is often a requirement for employment as a university professor, researcher, or scientist in many fields. Individuals who have earned a Doctor of Philosophy degree may, in most jurisdictions, use the title of 'Doctor'...often abbreviated 'Dr'...or, in non-English speaking countries...post-nominal letters such as 'Ph.D.', or 'PhD':

Comparatively, "philosophy' (of Doctor of Philosophy) does not refer to the (study) of philosophy, but is used in a broader sense in accordance with its original Greek meaning. ..."love of wisdom". In most of Europe, all fields...history, philosophy, social sciences, mathematics, and ...natural sciences,...other than the so-called ...vocational... curriculum..., were traditionally known as philosophy."

Historically, "the requirements to earn a Ph.D. degree vary considerably according to the country, institution, and time period, from entry-level research degrees to higher doctorates." U.S. students typically undergo a series of three phases in the course of their work toward the Ph.D. degree", 1. coursework, 2. examinations and "higher level" teaching, & 3. written dissertation.

- 4351 14. Statement on the postdoc **Excerpts from Education Foundation, "History of Education and History of The PhD, Post-Doctoral", Education Foundation Preliminary Paper Series, with sincere gratitude to EF PRA James E Curtis, Jr & Wikipedia.org.**
"A postdoctoral researcher or postdoc is a person professionally conducting research after the completion of their doctoral studies, typically a Ph.D. ... In some countries, postdoctoral research may lead to further formal qualifications or certification, while in other countries it does not. Postdoctoral research may be funded through an appointment with a salary or an appointment with a stipend or sponsorship award. Appointments for such a research position may be called postdoctoral research fellow, postdoctoral research associate or postdoctoral research assistant, i.e. PRA. The median salary of postdoctoral researchers is 44% less than the ...average for tenured positions"
